RECOGNITION

US Medical Board - California

Welcome to the Medical Board of California. The page lists recognized medical schools and includes a warning about deficiencies in training. The URL is www.mbc.ca.gov/applicant/schools_recognized.html#p.

Medical Schools Recognized by the Medical Board of California

The following is a list of medical schools recognized by the Medical Board of California. To locate a particular school, click on the letter for the country where that school is located.

If a medical school is not listed on the recognized school list, the medical school is either unrecognized or disapproved. The education and training received at an unrecognized or disapproved medical school is not acceptable for licensure in California.

Note: Students from some recognized international medical schools may have deficiencies in their training and will not meet the requirements for licensure in California. Any training deficiencies will require remedial training prior to licensure in California.

Warning: Some recognized medical schools that teach unless specifically stated, e.g., "University of Pecs Faculty of Medicine" may not be recognized and receive approval from the Medical Board of California.

Poland

- Academy of Medicine of Bydgoszcz
- Jagiellonian University Medical College (includes English program)

More.....Did you know?

- **Ignacy Łukasiewicz** (1822-1882), a Polish pharmacist, is the **father of petroleum industry & the inventor of paraffin lamp. First in the world to distil pure paraffin and the one who established a crude oil mine** near the town of Krosno (still in operation).
- **Andrzej Tarkowski** (born in 1933), a **Polish embryologist**, is the **pioneer of research in the embryology of mammals**. His research created theoretical and practical foundations for the achievements of biology and medicine in the 20th century: in vitro fertilisation, cloning and the discovery of stem cells.
- The international designations of blood types **O, A, B and AB** were introduced by a **Polish microbiologist**, serologist and immunologist **Ludwik Hirsfeld** (1884-1954) who also discovered the inheritance mechanism of blood types and the **Rhesus (Rh) factor**.
- **Vitamin studies as an area of science as well as the term “vitamin” itself** were established by **Kazimierz Funk** (1884-1967), a **biochemist** of Polish origin, who also discovered the B1 vitamin (thiamine).
- **Chandigarh (India)** was designed by Le Corbusier, in the 1950s. He was in fact the second architect of the city, after the initial plan was prepared by Albert Mayer and the **Polish architect Maciej Nowicki**.
- **Marie Curie** who won the noble prize in two different sciences was Polish.
- **Oct 23, 2014: Surgeons in Poland led by Dr Pawel Tabakow performed a ground-breaking cell transplant that allowed a paralyzed man to walk again. This is the first ever break-through in medical history.**
